RTS33 Wall switch
Format B5 Double rockers

ELDAT
Easywave
The RTS33 wall switch from the Format B5 range is a battery-powered wall transmitter that must be surface-mounted in dry rooms. The function of the wall switch is defined by combining it with different rockers.

The transmitter is compatible with the Busch-Jaeger switch range (see compatibility list). The transmitter module is combined with the desired rocker, simply clicked into the cover frame and is immediately operational. It can then be mounted on the wall using either adhesive pads or screws.

The RTS33 is generally used as a light switch to turn lights ON or OFF with a 2-button operation as well as to control roller shutters.

Please order the rockers separately!

RTS33E5004A11-02K

Technical specifications

Coding	Easywave
Frequency	868.30 MHz
Channels	1, 2 or 4
Range	typically 150 m in good free-field conditions
Power supply	1x 3V-battery, CR2032
